IQAC Meeting Agenda & Minutes for Academic Calendar

Session: 2020-2021

Meeting 1

Page No.
Date: 4/9/2021

Minutes of the meeting of
IQAC held on 4th September 2021, 11.30 am in
IQAC office.

Agenda of the meeting:

- 1) A&AR completion of 2020-21
- 2) Preparation of Road Safety proposal.
- 3) Publication of Annual Magazine 'Shabdshilp'.
- 4) Organisation of workshops and seminars.
- 5) Preparation of Academic Calendar.
- 6) Commencement of certificate Courses.
- 7) A review of SSR documentation.

Members present in the meeting:

- 1) Shri. R.W. Wanmali - 
- 2) Shri. D.W. Wanmali - 
- 3) Shri. M.G. Tagade - 
- 4) Prof. Vaibhav Padole - 
- 5) Prof. Priyadarshan Ganvir - 
- 6) Dr. C.D. Mungmode - 
- 7) Dr. Satish Kola - 
- 8) Prof. Sneha Mohurle - 
- 9) Dr. Naresh Bansod - 
- 10) Dr. Jayesh Papadkar - 
- 11) Shri. P.N. Ganvir - 
- 12) Shri. Pramod Borkar - 
- 13) Ku. Brajraj Gadpayale - 

Following points were discussed as
per given agenda and the resolutions were

passed.

- 1) AQAR 2020-21 is ready and IQAC members discussed about its submission. IQAC co-ordinator asked all criterion coordinators to take some time for reading AQAR once again so that the AQAR would be flawless. All IQAC members agreed.
- 2) Principal Dr. L.H. Khalsa informed IQAC co-ordinator and Road Safety Committee Head Prof. Nimesh Meshram to prepare Road Safety Proposal to send to RTO Office Gadchiroli for Central Government's award.
- 3) Editor and IQAC coordinator Prof. Nimesh Meshram told IQAC that the award winning Annual Magazine 'Shabdshilp 2021' is on the way of publication. The printing work of Shabdshilp is in progress and IQAC felt satisfaction on the performance of Editorial Board of 'Shabdshilp'.
- 4) Principal Dr. L.H. Khalsa motivated IQAC to encourage the faculties to organise workshops and seminars for the benefit of students and the staff and IQAC approved it.
- 5) As the Academic session of Gondwana University Gadchiroli has started from 30/08/2021, it is essential to prepare academic calendar of 2021-22.

IQAC special meeting will be called up to prepare an academic calendar of 2021-22.

6) Some certificate courses have been already started and Principal Dr. Lalsingh Khalsa needfully expected to commence these remaining certificate courses immediately.

7) It is necessary to start SSR documentation work right from today. As per new SOP guidelines the documentation work of self study Report is quite tedious and hence IQAC co-ordinator expected to start SSR work as early as possible and IQAC approved this.

A Study of Solar Panel System: Opportunities & Challenges

I. Introduction

The electrical energy is available to the home using nonrenewable energy resources such as hydroelectricity, electricity from thermal energy, atomic energy and so on. The problem in this nonrenewable energy is the supply and demand ratio is always not 1:1. The demand is much more than the supply. The government is trying level best to meet the demand of the electricity needs. Such energy produced from the nonrenewable resource is contributing a large amount of pollution in the form of CO₂, toxic gases, and water pollution. This is another challenge for the government to minimize the environmental pollution from the non-renewable energy resources. So the scarcity of the energy produced using non-renewable energy and its pollution made the government to seriously think about the energy from the renewable resources. The government of India started working on the renewable energy under the ministry of nonconventional energy during the 1980s. Our country is the first to establish a ministry on this renewable energy management under the banner of nonconventional energy

[1] Today our country is in a position to get the power of 57.472 GW as of 14 June 2017

[2] The contribution of energy from wind is 61% whereas from solar energy is only 19%. Looking into the efficiency of the renewable energy resources wind energy is more efficient than solar energy

[3] But wind energy system cannot be implemented to individual houses as the requirements to establish the wind energy are :

- The speed of the wind should be minimum 20 Km per hour.
- Longer the blades larger will be the energy production.
- Cost of initial investment is too heavy.
- The area surrounded by the wind energy should be free from obstacles.

However smaller wind turbines of the range 400Watts to 20KiloWatts are available for individual houses. The problem in installing such wind turbines in the individual houses is due to the lack of wind blow to generate the energy. This is also due to the non-availability of the free space around the house. Due to this the wind blow will not be possible due to various obstacles from the neighboring buildings or packed structure of houses or apartments. All these are negative aspects to generate energy through the wind turbines.

Principal
Mahatma Gandhi Arts,
Science & Late
College.

[4] The wind energy can generate energy 24 hours a day whenever there is enough amount of wind blow is there. Even though the efficiency of wind turbine both in commercial scale and small scale is 60% it is not getting entertained by individual houses for decentralized production because the initial cost is too high, irregular wind blow and regular maintenance work is difficult.

Even though the efficiency of solar energy is just 18% due to several factors the solar energy system is more entertained in individual houses as a decentralized energy source. The factors are

- Availability of convenient power generation.
- The rooftop is large enough to install the solar panel.
- In all the houses the sunlight is available at least for five to six hours .

[5]The solar panel will be available in different sizes and different power ratings. This makes the owner to decide what is the capacity of the power production, what is the area of the rooftop which is suitable for installing the solar panel and what is the cost of installation

[6] It is very clear from the above introduction that instead of going for a small scale wind energy even though the efficiency of the same is 60%, due to the geographical structure of the house which blocks the wind blow thus it is not advisable to have a decentralized wind turbine at each house.

VI. Data Collection

A) Primary Data

SOLARPIX ENERGY PVT. LTD., ARMORI.

A new high-performance and affordable solar drying system for chili farmers in India. Traditional open-sun drying takes 2-3 weeks, leading to degradation of chili quality and loss of marketable chilies. Commercially available heat pump dryers can address this issue but require more electric power and Cap Ex than are available in rural areas. The new product dries chilies in 3-4 days, reducing risk while increasing chili quality and quantity. Researchers accomplish this by utilizing thermal management techniques to convert a low-cost, inefficient greenhouse into a well-controlled drying structure. Morsel conducted a survey with chili farmers and producing groups to test the drying-as-a-service business model.

VIII. Result & Discussion

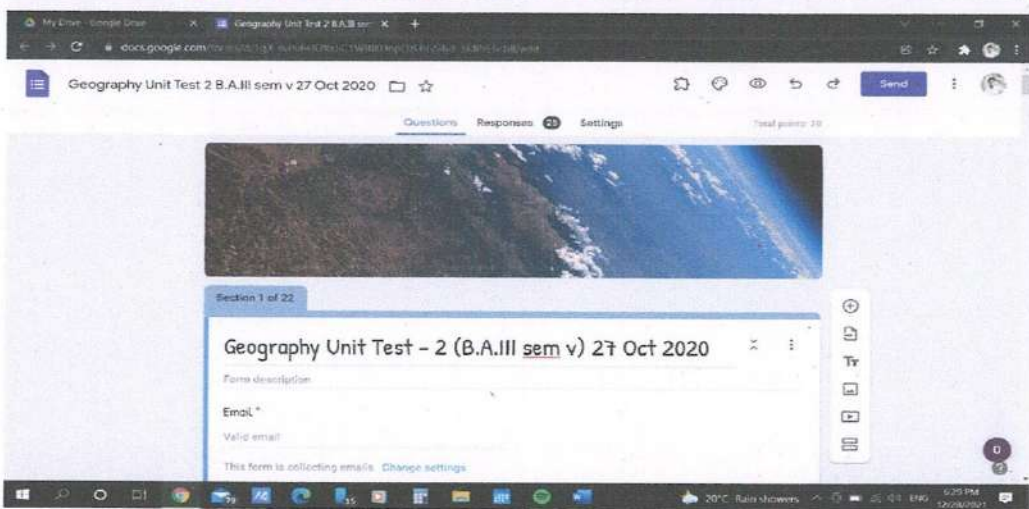

The international solar community sees a very big market of solar power in India but due to the lack of single comprehensive policy the growth of the solar power sector is sluggish even when there are various motivational factors like, abundant solar radiation, availability of land and low cost are available in the Indian subcontinent. shows the ratings of barriers faced by the solar power developers. Around 63% of the developers interviewed stated that barriers in policy & regulatory aspects and technological aspects were the most significant barriers. Around 53% of the developers stated that along with policy barriers, the infrastructure barriers are also critical. Approximately 27% and 28% of developers viewed financing and transparency & accountability aspects of barriers as critical respectively.

At international level India is facing pressure to control the green- house gas emission, therefore the Government of India has released Jawaharlal Nehru National Solar Mission to install 100 GW of solar power installation across the country by 2022. In order to successfully attain the target, the government has to extend support to the solar industry in the form of formulating common policy at the federal level, proper implementation of the policies at the ground root level, single window clearance system, easy and long term financing and proper infrastructure. Apart from this the Government must invest to improve R & D facilities, manufacturing facilities and Infrastructure for the growth of the solar power sector in India.

Notification

Subject: Regarding the submission of internal evaluation marks and audit course marks for the Winter 2021 session.

Regarding the above-mentioned subject, all the principals and concerned are informed that for the Winter 2021 examination, the internal assessment marks of all the students in the undergraduate and post-graduate courses and the marks of the Audit Course is to be submitted to the University online from 01/01/2022 to 11/01/2022 and also, to keep attested hard copy or handwritten copy of the submission to the college.

Please note that all students in colleges where permanent principal, executive principals or approved teachers are not available will be given internal assessment marks as a percentage of the marks obtained in their written examinations.

Also, the marks of the subject for which credit has been given are to be sent to the university and for the subject with grade, the grades are to be given.

Special notice

- 1) Online marks should be uploaded on <https://gondwanauniv.emdoar.com> website.
- 2) It should be noted that once College Internal Assessment marks are submitted in the universities, no change can be made in these offenses.
- 3) It should be noted that if College Internal Assessment marks is not submitted within the prescribed time and submitted online, the result will not be declared and after the deadline no Marks will be accepted in any way and the entire responsibility will remain with the concerned college.
