Brief Report on Certificate course in Herbal Medicine

(10-Nov, 2021 to 05-Jan, 2022)

Herbal medicine has a long tradition in all cultures. Applications in practice have proven the huge benefits of herbs. As well as relieving symptoms, herbal medicine also works on a deeper level to help patients return to full harmony. Herbal medicine is becoming ever more popular, as ever more people seek out qualified herbalists.

Course Overview

Length of Study: 45 days (depending on chosen schedule)

Hours: in an average 45 hours

College Locations: M.G. College, Armori, District Gadchiroli, Burdi, Wadsa Road.

Certificate course: Herbal Medicine

Approval by: UGC sanctioned.

Herbal Medicine certificate course is divided into three parts and takes 45 days to complete depending on chosen schedule. Course runs under the guidance of Principal of our college.

CERTIFICATE COURSE OBJECTIVES:

1. The Herbal Medicine certificate course provides high quality training which equips graduates to build successful practices.
2. It is carefully structured. Each study unit builds on the previous one, allowing students to develop their confidence and skills, and reach their full potential as Herbalists.

INTRODUCTION:

Herbal medicines derive from the plants and plant extracts having medicinal value. During the metabolic processes, plants become the source of a variety of chemicals, which can be classified into primary metabolites that are produced by all the plants, and secondary metabolites that are produced by only some of the plants. Many of these secondary metabolites have therapeutic properties and hence are used for producing drugs. Use of herbal medicine, sometimes also referred as 'Herbalism', is an ancient practice for healing.

In most of the developing countries, the main source of medicines is plants and emphasis is given to indigenous forms of medicine rather than to rely on imported drugs, which are not only expensive, but are often incompatible with the local diseases. The commercial value of herbal medicines is high and gaining momentum in international market. The growing market for herbal

medicines and other natural health care products also demands an extensive research not only for its great healthcare potential but also for the commercial benefit.

In order to acquaint the scientists, researchers, academicians and industry representatives who are engaged in the work on the developments in the fields of medicinal plants, herbal medicines and traditional systems of medicines. This certificate course will be instrumental in bringing together the experts on traditional medicines to take an inventory of the major medicines in their respective regions / sub-regions as well as manufacturers of traditional medicines to share knowledge and experiences and seek possible business expansion.

Introduction:-

Language is the means of communication. It is the most important tool through which we communicate our ideas and thoughts to other individuals and groups. English is the language of the globe and has a very significant place among all the languages spoken in the world. It is not only a language of the communication but an earning source of the number of people. So, in the professional sector one needs to achieve formal communication skills and techniques which help in the development of the individual. A Certificate Course in communicative English provides these skills and techniques. According to the need of the students of the tribal area this course would bring required changes among the students.

Objectives:-

1. To understand simple texts and a range of high frequency vocabulary in context.
2. To describe aspects of personal and everyday life in both oral and written form.
3. Produce short and simple connected texts on familiar topics.
4. To demonstrate some control of essential grammatical structures.

The course was conducted for the First, Second, Third Year Students. All three streams of the college were included in the course. But the target group for the course is first year undergraduate students. This course was designed & conducted to impart the knowledge and to develop the skill for the daily life communication and official communication. The express purpose of the course is to make the students competent in the use English language. The students were introduced the syllabus of the course, distribution of the marks and paper pattern. All the faculties of the English Dept. delivered lecture according to the scheduled of the course.

REPORT OF ADD-ON COURSE IN

VACUUM SCIENCE & TECHNOLOGY

15/11/2021 to 04/12/2021 (Duration: 34 Hours)

**SUBMITTED BY
Dr. C.D. MUNGMODE
DEPARTMENT OF PHYSICS**

INTRODUCTION

Vacuum technology has diversified applications in different areas of science and engineering. These includes the major fields like Electronics, Metallurgical / Chemical Processing, Food Processing, Space Simulation, Nuclear Technology, etc. This has resulted in rapid development of many sophisticated vacuum instruments, pushing the range of vacuum to 10^{-12} Torr. To introduce Undergraduate students to the field of vacuum science and technology is very essential. Keeping this in mind, present add-on course on *Vacuum Science & Technology* is undertaken by the Department of Physics.

OBJECTIVES

The main objectives of the Add-On Course are:

1. To enhance the knowledge and skills in more specialised area of Physics beyond curriculum.
2. To provide an opportunity to students to seek the knowledge about *Vacuum Science & Technology*.

COURSE DETAILS

- * Course duration : 34 Hours (15/11/2021 to 04/12/2021)
- * Course Co-ordinator : Dr. C. D. Mungmode
- * No. of students admitted : 18 students

EVALUATION

A Multiple Choice Questions (MCQ) Test of 50 Marks was conducted at on 05/12/2021. The students who scored 40 % marks in test and have minimum 75 % attendance were awarded by course certification. All the students successfully completed the course.

COURSE OUTCOMES

Following course outcomes are achieved after completion of this course

- * CO1 - Students got knowledge of various pumps and gauges.
- * CO2 - Physics behind different techniques of creating and measurement of vacuum is understood.

Brief Report
On

"Certificate Course in Hands on Training of Basic Chemistry Software's

Salient features of certificate course:

- ✓ Theory and practical session as per curriculum
- ✓ Lectures include entire process of downloading and installation of these software's.
- ✓ Hands on training on all these software's
- ✓ At end of course candidate will be able to use these open-source software's independently for their work.
- ✓ A certificate will be issued to the successful candidates

Objectives: The main Objectives of this certificate Course are:

- ❖ To provide an opportunity to students to seek the knowledge about various latest essential open-source chemistry tools which are Crucial for students and researcher.
- ❖ Improve their software uses skills through hands on training.
- ❖ At the end of course:
 - a) The students will be able to use these software's for drawing chemical structures, generation of their names.
 - b) Retrieve information about physical properties calculations, three-dimensional molecular structure, spectroscopic analysis.
 - c) Able to draw graphs by using origin software and do analysis of collected data.

Guidelines for conducting Certificate course:

- ❖ Students studying in B.Sc. Second and Third year are eligible for registration of this certificate course.
- ❖ Practicals for the hands-on training are conducted during the reserved time slot in a week or beyond the regular class hours.
- ❖ This course may be also conducted during weekends/ vacation period.
- ❖ The duration of the Add-On course will be 30 hours
- ❖ Evaluation Process: - internal assignment are given after Completion of module and final test will be conducted for 50 marks after the completion of the course
- ❖ All successful candidates will be awarded with certificates.

Procedure for registration: A student shall register for an Add-On Course offered during the semester by submitting the duly filled-in registration form to the course coordinator. The time table for the classes of Add-On courses will be notified to the students.

Grading: A Multiple-Choice Test (MCQ) of 50 Marks will be conducted at the end of the course through online/offline mode. Minimum 75% attendance and 40% marks in test are mandatory for award of certificate. A candidate who has NOT secured a minimum of 40% of marks in a course shall not be awarded certificate. The Grades will be awarded to the students depending on the percentage of marks obtained by a candidate in a course as below

<i>Grade</i>	<i>Marks (%)</i>
<i>A +</i>	<i>75 and above</i>
<i>A</i>	<i>60 - 74</i>
<i>B +</i>	<i>55 - 69</i>
<i>B</i>	<i>45 - 54</i>
<i>C</i>	<i>40 - 44</i>

Module 1 (4 hours)

ACD Che Sketch software: – Introduction, download and installation process, Drawing various chemical structures (acyclic, cyclic, polycyclic, heterocyclic), name generation from structures, conversion of name of molecule into its structure, calculation of physical properties such as density, molecular weight, molecular formula, refractive index from structural formula, bond angles, bond lengths, dihedral angles.

Learning outcomes: - After successful completion of this module candidate will be able to use ACD Chem Sketch for generation and processing of simple and complex chemical structures.

Module 2 (5 hours)

Cambridge ChemDraw Ultra software– Introduction, download and installation process, Drawing various chemical structures (acyclic, cyclic, polycyclic, heterocyclic), nomenclature generation, conversion of name into molecular structure, calculation of physical properties such as density, molecular weight, molecular formula, refractive index from structural formula. ¹H, ¹³C NMR prediction from molecular structure, Drawing structure of bigger molecules such as proteins, carbohydrates, and RNA/DNA, bio arts, use of templates, Comparison of ACD ChemSketch and Cambridge ChemDraw Ultra software.

Learning outcomes: - After successful completion of this module candidate will be able to use Cambridge ChemDraw Ultra for generation, processing and calculation of physical/chemical properties of simple and complex molecules.

Module 3 (8 hours)

Chem3D software: - Introduction, download and installation process, 3D structures of molecules, various 3D structure models, conversion of 2D structure into 3D structure, File extensions, Cartesian coordinates, Dihedral angles, Energy minimization, calculation of surface properties, calculation of molecular electrostatic potential (MEP) surface, electrostatic potential (ESP) surface, solvent accessible surface. Atomic charge calculations, Calculation of dipole moments, MM2 calculations, Huckel calculations, Calculation of UV and IR spectra using MM2 calculations.

Learning outcomes: - After successful completion of this module candidate will be able to study three dimensional properties of molecules which are highly useful in prediction of their chemical/ physical properties and can be applied in advanced research work.

Module 4 (5 hours)

Introduction to online chemical database search, Searching and downloading research papers using keywords in Scopus, Science direct, and google scholar, reaction search, product search, reactant search, structure search, markush search using Sci-finder. Introduction to End Note and its applications.

Learning outcomes: - After successful completion of this module candidate will be able to use online research tools efficiently and will be able to search research papers related to their topics more efficiently.

Module 5 (8 hours)

Chimera 1.12 software: - Introduction to Chimera software, Protein-ligand Docking, Protein data bank structure search, preparation of ligands and proteins for docking, Sites searching for ligand binding analysis, Docking of simple molecules over active site of protein molecules and analysis of docking results.

Learning outcomes: - After successful completion of this module candidate will be able to study drug-receptor interactions through docking. The knowledge of these interactions is a fundamental requirement for modern drug discovery process.

CERTIFICATE COURSE IN HUMAN RIGHTS

1 MARCH TO 10 APRIL 2022

(35 hours)

Introduction:

This course has been designed to give students an insight of perspectives of Human Rights. The course will enhance their expertise over the subject and will be an important value addition to the CV. This course is designed by the people having expertise over the subject matter and every module is prepared in simple language. The study group comprise principal and subject expert from the college, particularly the faculty with specialization in human rights.

Human Rights are those rights which every human being enjoys on the basis of equality irrespective of caste, race, religion, place of birth, sex or any other economic and social status. These rights are guaranteed under the constitution of India in the form of Fundamental Rights and Directive Principles of State Policy. Human rights are based on the principle of respect for the individual. Their fundamental assumption is that each person is a moral and rational being who deserves to be treated with dignity. They are called human rights because they are universal. Whereas nations or specialized groups enjoy specific rights that apply only to them, human rights are the rights to which everyone is entitled—no matter who they are or where they live—simply because they are alive. There is no question these are important rights, but the full scope of human rights is very broad. They mean choice and opportunity. They mean the freedom to obtain a job, adopt a career, select a partner of one's choice and raise children. They include the right to travel widely and the right to work gainfully without harassment, abuse and threat of arbitrary dismissal. They even embrace the right to leisure.

The main Aims and objectives of the 'Certificate Course in Human Rights' are as follows:

Aims & Objectives: -

1. To enhance Human Right knowledge among students.
2. To give information about the history of human rights and modern human rights as well.
3. To create awareness about moral, ethical, social and democratic values.
4. To cultivate social welfare from the awareness of Human right.
5. To spread information about Human Rights and Duties.
6. To inform the learner about Human Rights issues and develop basic understanding of Human Rights and their enforcement.
