With the increasing relevance of Intellectual Property (IP) in this era of globalization, it is important to recognize the role which IP system play in the growth of the Nation. The current global economic crisis is also focusing on renewed attention on the urgent need to incentivize and protect innovation to both solve the world's most challenging problems and to generate jobs and economic growth. The power to evolve innovations and thinking in an innovative manner in an organization can be increased by means of creating Intellectual Property (IP) awareness amongst its employees and students, who are directly or indirectly involved in the process of innovation. From last

many years it was observed that, filing of IP applications in the country are not increasing despite significant contribution towards R & D by various students, institutes, scientist and R & D organizations.
